Third-generation AI · Mind intelligence

GAIBRA Enterprise

Institutional intelligence

From using AI to owning institutional intelligence: a system that supports leadership and departments in raising the quality of decisions.

Executive Council

For the CEO

Eleven advisors representing the C-suite discuss the decision you bring, show where they agreed and disagreed, then give a reasoned recommendation. The decision is yours.

Enterprise Advisor

For every manager and employee

A specialist advisor for every manager and employee – from finance and human capital to institutional excellence – working toward your goals, within your policies.

Every number sourced, every judgment traceable. From the CEO's table to every employee.

EXECUTIVE COUNCIL

Executive Council

Every major decision ends with you. The Executive Council surrounds you with eleven C-level advisors who weigh the decision from every angle before you make it.

CFO Finance	**COO** Operations	**CSO** Strategy
CRO Risk	**CHRO** Human capital	**CLO** Legal

Six of the eleven C-suite seats.

How it works

1. **Present your decision and its options**, with your figures and your company's situation.
2. **The council convenes**, and each member states a clear view from their discipline.
3. **A reasoned recommendation is issued**: the preferred option, risks and opportunities, and the judgment's path and sources.
4. **The decision is yours**: approve, reject or defer the recommendation, and sign your decision.

Policies as red lines

Your company's binding policies are respected in every recommendation.

Fill the gap

If a member lacks information, you supply it and the member reconsiders.

Dashboard and report

A risk and opportunity matrix, and an executive report that leads with numbers.

The council advises. The CEO decides.

The recommendation is sealed and recorded; the decision always stays human.

ENTERPRISE ADVISOR

Enterprise Advisor

A specialist advisor for every manager and employee – from finance, human capital, marketing and operations to institutional excellence. It works toward your goals, within the policies set by senior management, and gives you a complete view of department progress.

Goals you set → **An advisor per manager** → **Department reports** → **Your executive report**

Company goals

You set them, and the advisor ties every employee's recommendations to them.

Policies

Binding or guiding. Every recommendation rests on them; when a request conflicts, it says so and offers a compliant alternative.

More than 30 minds in 10 domains

Financial, Human Capital, Institutional Excellence, Marketer, Executive and more. You decide which minds each member uses.

Decision deeds

Sent between members for approval; every registered deed has a number and a QR code to verify its integrity.

Consolidated executive report

Department reports in one report for you: deviations from goals, risks and recommendations.

Memory for every employee

It remembers each employee's work across conversations while the seat is active; employees can view and delete it.

Accountable institutional judgment

Every number sourced
Computed by deterministic engines, shown with its origin.

Every judgment traceable
You see how it reached its recommendation, and can review it.

The decision stays human
The recommendation is sealed; approval belongs to the authorized person.

Roles and permissions
Everyone sees what their role allows, and you choose the minds.

Hosted in Saudi Arabia
Your company's data is hosted in the Kingdom of Saudi Arabia.

Your data is yours
No model is trained on your company's data.

Pricing

Start with either part, and add the other when you see the value.
